1. What are the most important **achievements** arising from WSIS that should be highlighted in the Zero Draft? *

> Regarding the most important achievements that should be presented in the zero draft, we consider it of significant value to include topics such as:
> Technology for development
> Bridging the digital divide
> Internet and data regulation and governance
> And not ruling out important challenges of the current era, such as those posed by artificial intelligence for nations.

2. What are the most important **challenges** to the achievement of WSIS outcomes to date and in the future that need to be addressed in the Zero Draft? *

> The challenge we consider of greatest importance is the generation of laws, protocols and regulations that allow nations to rotate in the same dynamics of the advancement of digital transformation

3. What are the most important **priorities** for action to achieve the WSIS vision of a 'people-centred, inclusive and development-oriented Information Society' in the future, taking into account emerging trends? *

> Closing the Digital Divide Inclusively
> Priority: Ensure affordable, high-quality connectivity in rural, indigenous, and vulnerable areas.
> Emerging Trend: Expansion of 5G, community, and satellite networks.
> Key Action: Public policies for universal access and financing of digital infrastructure.
> Promote Digital Skills for All
> Priority: Strengthen digital skills from basic education to vocational training.
> Emerging Trend: Automation, AI, and labor market transformation.
> Key Action: Digital literacy programs, cybersecurity training, and 21st-century skills.
> Ensure Privacy, Trust, and Cybersecurity
> Priority: Create regulatory frameworks to protect personal data and combat cybercrime.
> Emerging Trend: Increase in cyberattacks and risks with generative artificial intelligence.
> Key Action: National cybersecurity strategies, CERTs, data protection laws, digital security education.

4. What **additional themes/issues**, if any, should be included in the Elements Paper? *

> Promote participatory and transparent digital governance by including governments, the private sector, civil society, and academia in decision-making regarding the internet. Encourage debates on digital sovereignty, content moderation, and artificial intelligence.
> Build multi-stakeholder digital governance frameworks and public accountability on digital platforms. Finally, multi-stakeholder digital governance frameworks and public accountability on digital platforms are of utmost importance.

5. Do you wish to comment on **particular themes/issues/paragraphs** in the Elements Paper? *

> Legislation, exploring alternatives and beneficial uses of artificial intelligence, focusing on human inclusion and promoting digital literacy.

6. What suggestions do you have to support the development of the **WSIS framework** (WSIS Action Lines, IGF, WSIS Forum, UNGIS etc.)? *

Strengthen national participation in international forums
Align national plans with the WSIS Action Lines
Involve multiple stakeholders
Produce and share knowledge and data on digital development
Actively support UNGIS and its initiatives
Develop technical and regulatory capacities
Promote cooperation

7. Do you have any **other** comments? *

We believe we have completed the required information

8. Who is **submitting** this input? *

Kindly provide the name of the person submitting this input, as well as the associated country, organization, stakeholder type, and relevant contact information

Rodolfo Izeppi, Guatemala Asesor del Cuarto Viceministro de Tecnología de la Información y las Comunicaciones del Ministerio de Gobernación

9. Please provide your **e-mail** address: *
