- Since 1950, the region has been hit on average, by seven disasters per year, that have killed hundreds of thousands of people and affected millions more
- Annual damage in the Caribbean accounts for 40 percent of global damage
- Caribbean small states have suffered more damage at greater frequency than both other small and larger states
- Climate change is expected to exacerbate these effects by increasing the frequency and severity of natural disasters, affecting the livelihood of the populations, and harming the essential assets their insufficiently diversified economies rely on.

1
Tranquil, calm, serene sea
Beckoning, welcoming
Embracing, enfolding me
Azure, cobalt or aquamarine
The reef merely murmurs
Panoramic scene of recreation, enjoyment
Nocturnal romance platform for
Dalliance and denials
That was yesterday
A transformation is underway, today
The named storm is here
There is atmospheric change everywhere

2
Today the sea rages,
Froths and foams
Shrieks and sways with swells
Evokes screams and provokes yells
Yet brave sea birds signal
They are aware yet not afraid
Circling, surveying the
Boats tossed like toys in a tub
The boys venturing much too close
Risk for them is merely a word, not a reality
For young minds of curiosity
A body overcharged with curiosity and energy

3
A storm surge, surges inland
To burn and scorch
Winds and waves of relentless ferocity
Slam against rocks and infrastructure
Infrastructure crumbles, rocks remain
The beach so pristine, now gone
Monumental damage and destruction
Despair looms for the desperate
As steel gray sky kisses silver sea
I gaze in awe and trepidation
My frailty and insignificance
An antidote to creeping arrogance

4
Amazed at the power, the mystery of creation
We anxiously pray for fishers who heeded warnings late
Hoping to return safely to port
And the welcoming, safe arms of loved ones
Human mortality as tangible as the rain
Anxiety as deep as the slamming sea
The fear of loss, the hope for safety
Override all other considerations,
Rise to the crest of emotions
The transformation aesthetically wonderful
Yet we must all be careful, even fearful
The transformation, a force balancing an equation

HOW CAN WE TRANSFORM?

4-STEP TARGETED INNOVATION PROCESS

CLARIFY

- Need to frame the challenge in a way that encourages creative problem solving
- A good framing question
 - Forward looking
 - Action Oriented
 - Compelling
- Gathering Data/Stakeholder Engagement

Leader's Role

- Develop shared understanding
- Bring together diverse perspectives
- Clarify sufficiently but not get stuck in analysis paralysis

IDEATE

- Create a collective sense of what's possible
 - What are the ways we can potentially solve this problem?
 - What can we try/experiment with in order to see what happens?

Leader's Role

- Push your team to think creatively
- Keep scope realistic
- Keep focus on the challenge

DEVELOP

- Create a well-refined concepts through prototypes, experimenting, test, low risk sharing
- Develop collaborative relationships (gaining acceptance)
- Help team identify additional stakeholders

Leader's Role

Ensure the concepts, solutions are refined, but not get stuck in refinement that nothing moves forward

(Polarity to be managed)

IMPLEMENT

- The 'Doing' Phase
 - Piloting & Rolling Out
 - Learning & Adapting

Leader's Role

- Help your team take in new information and adjust as needed
- Keep the innovation on target
