13th Edition of the Report

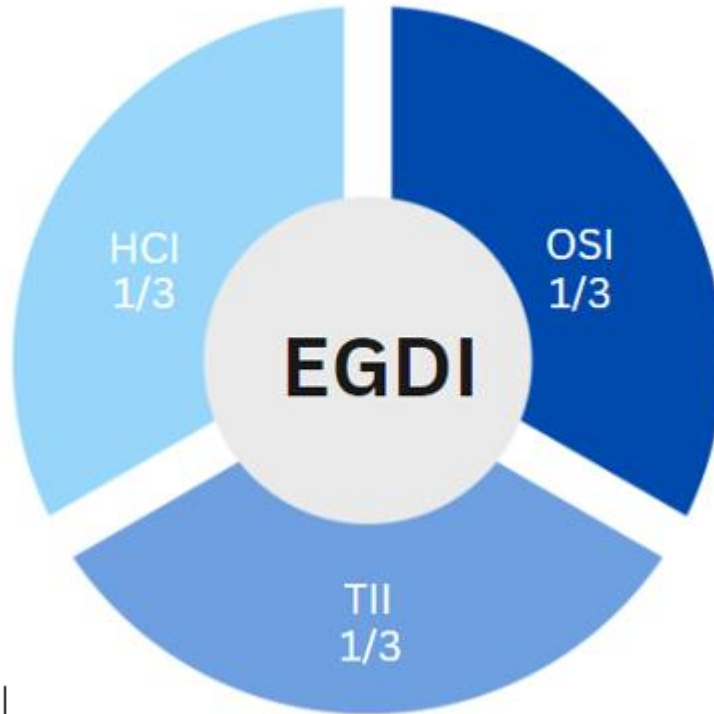

More than 20 years of data – and a vision of the future

The Survey looks at how digital government can facilitate integrated policies and services across 193 UN Member States. It supports countries' efforts to provide effective, accountable and inclusive digital services to all, bridge the digital divide and leave no one behind.

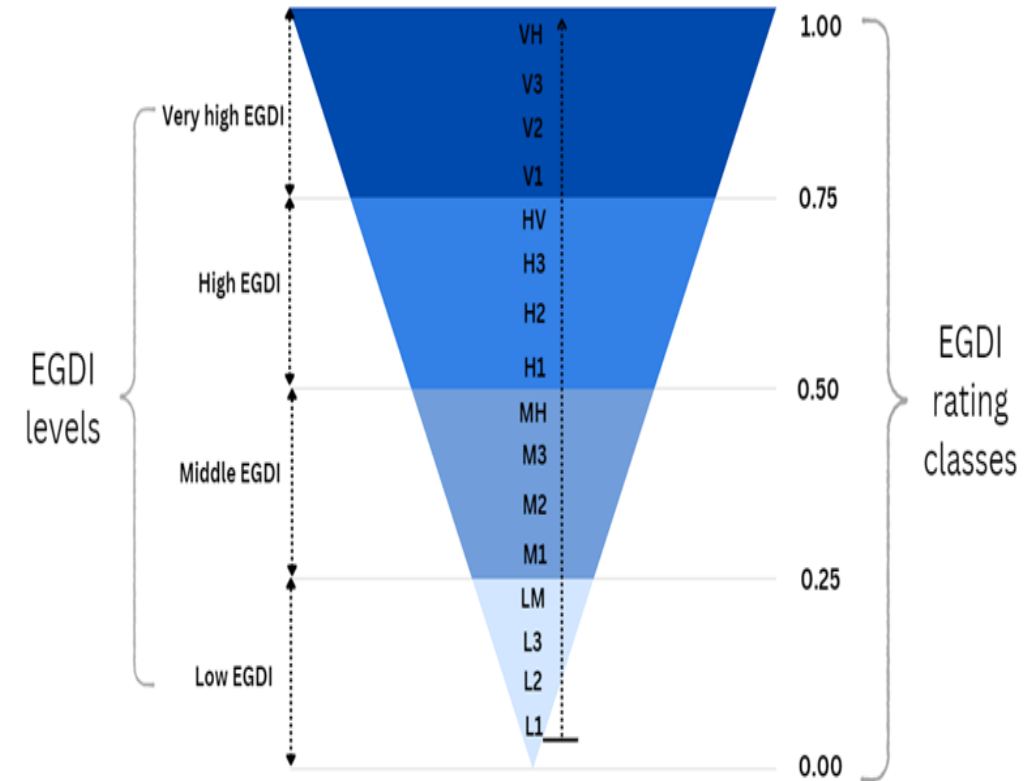

E-Government Development Index EGD

OSI - Online Service Index

TII – Telecommunications Infrastructure Index

HCI - Human Capital Index

$$EGDI = \frac{1}{3} \cdot (OSI_{normalized} + TII_{normalized} + HCI_{normalized})$$

E-Government Development at a Glance

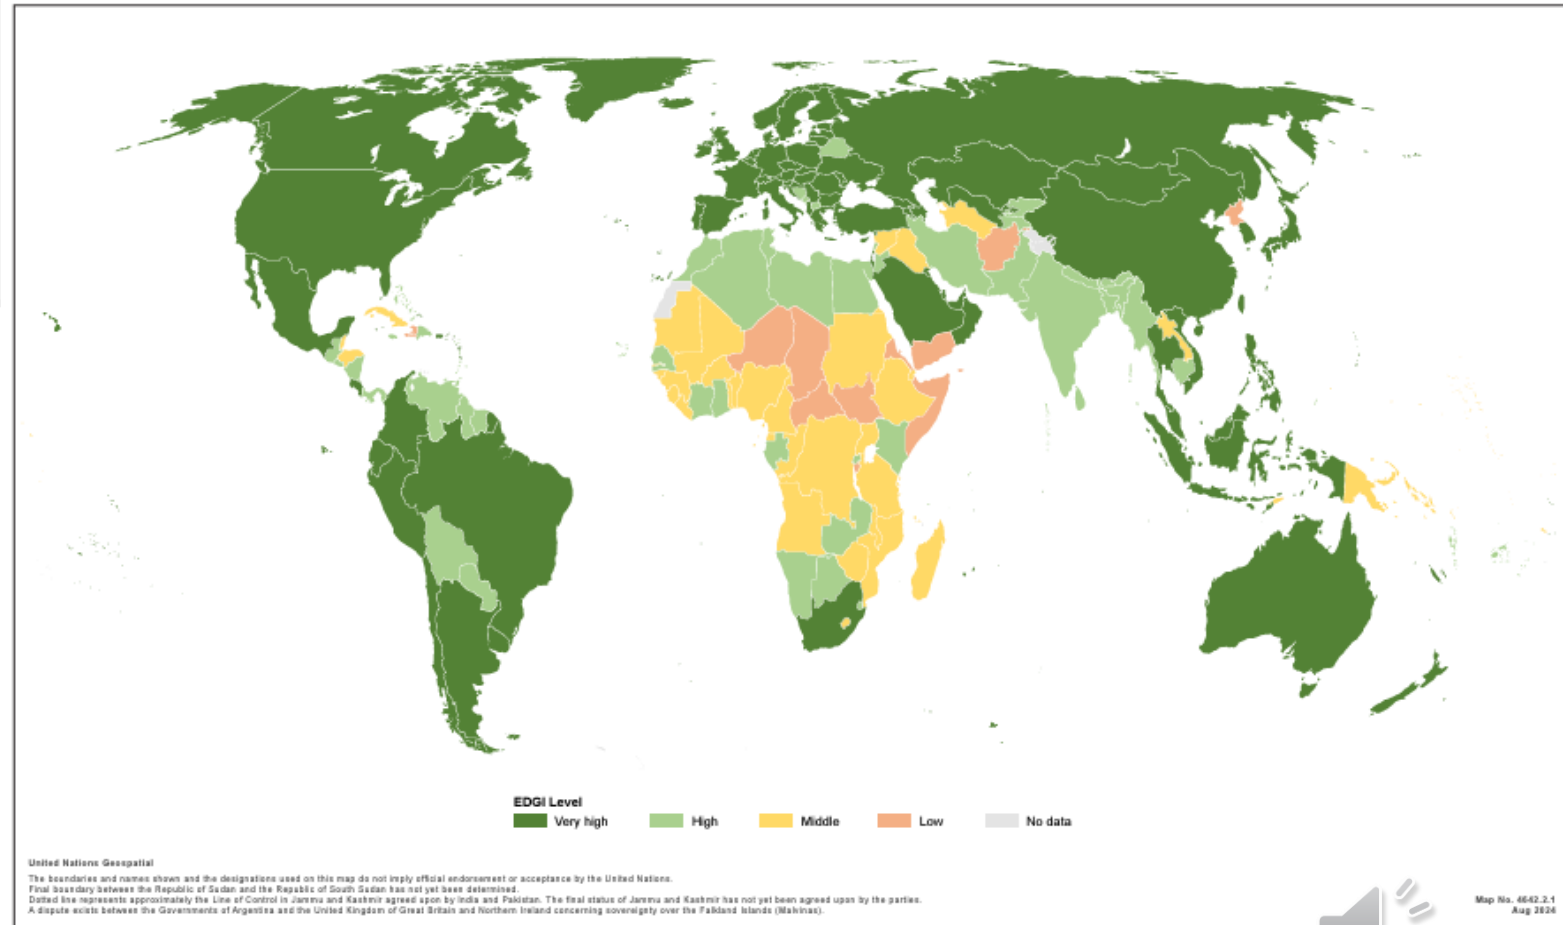

E-government development has improved at the global level, with the average EGD value reaching 0.64 on a scale of 0 to 1, up from 0.61 in 2022

For the first time, Member States with very high EGD values comprise the largest share, accounting for 39% of the total (76 of the 193 MS)

However, the number of countries with low EGD values has increased from 7 to 11 since 2022, primarily due to geopolitical conflicts and post-conflict situations.

EGDI 2024: Countries Improvement

23 Countries moved to higher E-Government Development Index (EGDI) groups:
17 countries from the high to the very high group

6 countries from the middle to the high group

Countries Leading E-Government Development, 2024

The 2024 VH rating class includes 18 countries, 10 from Europe, 6 from Asia, and 2 from Oceania, marking a net increase of three countries from the previous edition

Denmark remains the top global EGD I performer, leading Europe, which accounts for 56% of VH-rated countries

Germany, Norway, and Spain joined the VH group in Europe, while Bahrain and Saudi Arabia moved into the VH rating class from Asia

In Oceania, Australia and New Zealand continue to lead in e-government development, as they have for the past four editions

Country	Rating class	Region	OSI	HCI	TII	EGDI (2024)	EGDI (2022)

E-Government Development: Regional Trends

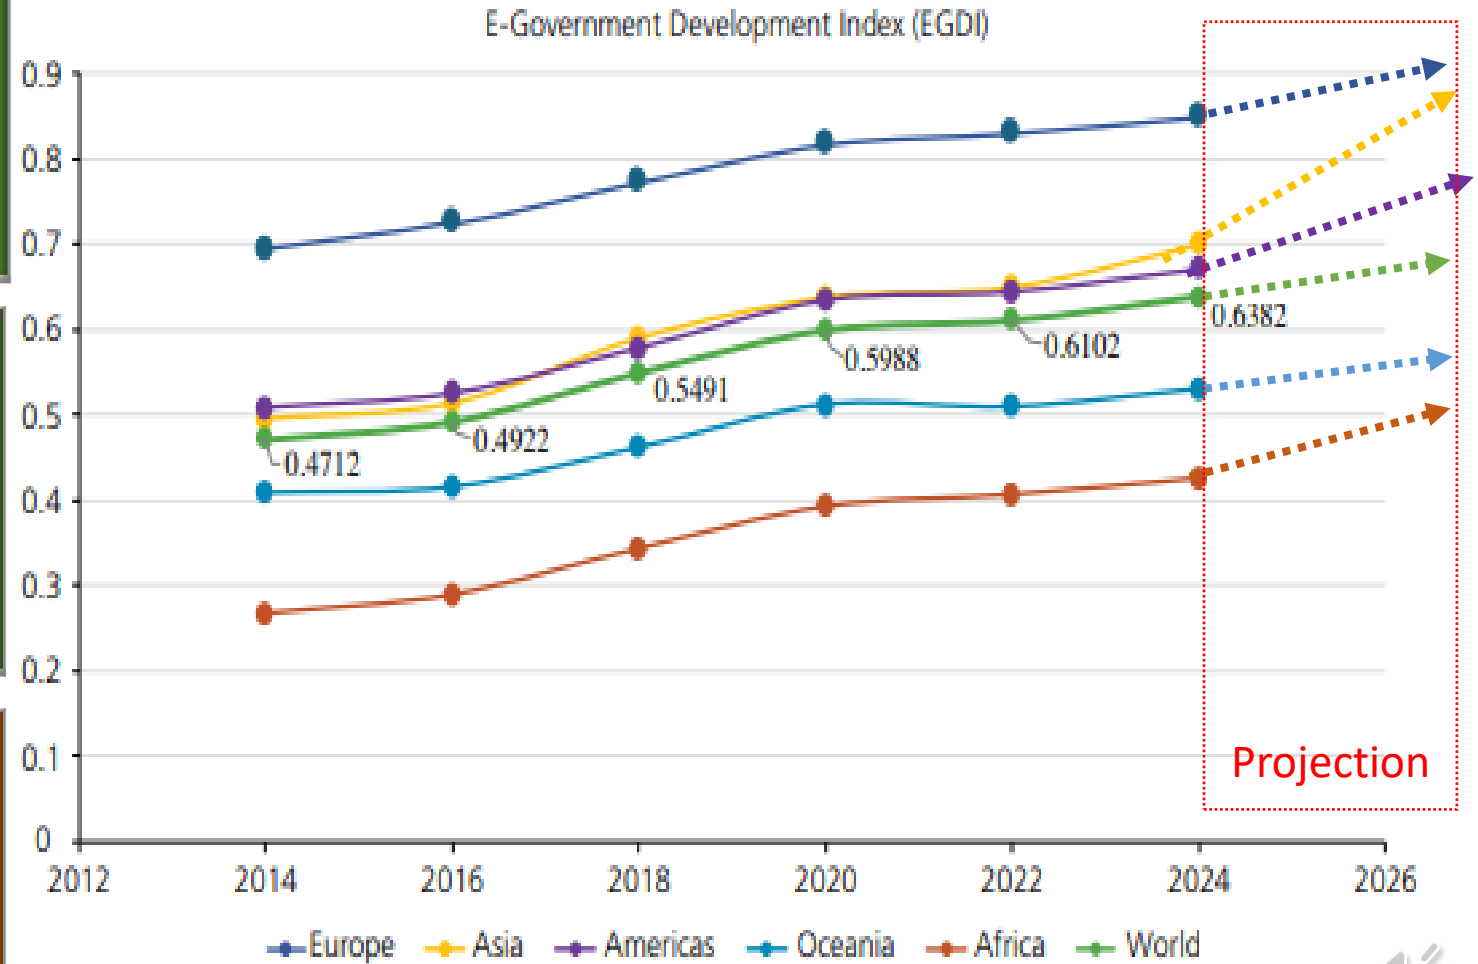

Average EGD values have improved in all regions since 2022. Europe remains the leader, followed by Asia, the Americas, Oceania and Africa

Asia has made the most notable progress, with a 7.7% increase, followed by Africa (4.8%), Oceania and the Americas (4.1%) and Europe (2.3%)

However, despite the significant progress achieved in Oceania and Africa, the EGD average for these two regions remains below the global average of 0.64

Countries Leading E-Government Development in Asia, 2024

Rapid Digital Advancement: Asia has experienced the most significant progress in e-government development globally, with countries like Singapore, the Republic of Korea, and Japan consistently ranking as top performers due to their advanced digital infrastructures and innovative public service solutions.

Emerging Digital Leaders: Countries such as Saudi Arabia, the UAE, Kazakhstan, Türkiye, and China have made impressive strides by investing in digital infrastructure and adopting technologies like AI, blockchain, and IoT, which are revolutionizing public administration and service delivery.

Widespread Improvement in Digital Government: In 2024, 25 Asian countries are now in the "very high" EGD I group, showcasing regional growth in digital governance. Notable advancements include Mongolia, Armenia, and Qatar, which have moved into the very high EGD I category for the first time.

Positive Competitive Environment: The rapid digital transformation across Asia is fostering a competitive environment, encouraging continuous innovation and improvements in digital governance. This regional success serves as a model for other global regions aiming to enhance governance through technology.

Online Services Provided globally and in each region in 2024

At the regional level, Europe has the highest degree of full digitalization among the services assessed, followed by Asia, the Americas, Oceania, and Africa. At both the regional and global levels, rates of full digitalization are highest for the types of online services that support business registration, licensing, and paying taxes (around 50 per cent globally) and applying for government vacancies (48 per cent).

Source: 2024 United Nations E-Government Survey.

Note: The darker shades of colour highlight the proportion of fully digitalized services in each region, and the lighter shades indicate the availability of information, online forms or instructions about the services provided by the Governments.

New Features adding:

- EGDI historical patterns
- Possibility to compare countries for selected editions
- Possibility to compare cities for selected editions

The United Nations E-Government Knowledgebase is a benchmarking tool that provides a comparative assessment of the e-government development of UN Member States and 193 municipalities. It offers an interactive snapshot of each country's national and local e-government development from a regional and global perspective.
