GovTech drives the sustainability of Digital Transformation

Need for Change

Government Global Trends

Digital Egypt

- Citizens and the private sector increasingly expect the same performance from government services as they would from private companies.
- Public services provided today need to change to adapt the digital transformation dynamics

- **Whole of Government**
Integration and consensus of all government agencies and institutions on a unified vision
- **Whole of Society**
The work of all elements of society to deal with societal problems and opportunities

Culture & Mindset of Digital Egypt

- Citizen First
- Digital First
- Holistic & Collaborative
- Government as a platform

GovTech Conceptual Framework

Collaborate with the Private Sector Startups, to utilize innovative technologies and deliver digital products to the Egyptian citizen, which are proactive, personalized and specifically designed to address their life time events' needs.

MSMEs are at the heart of the Egyptian Economy

Drivers of Innovation

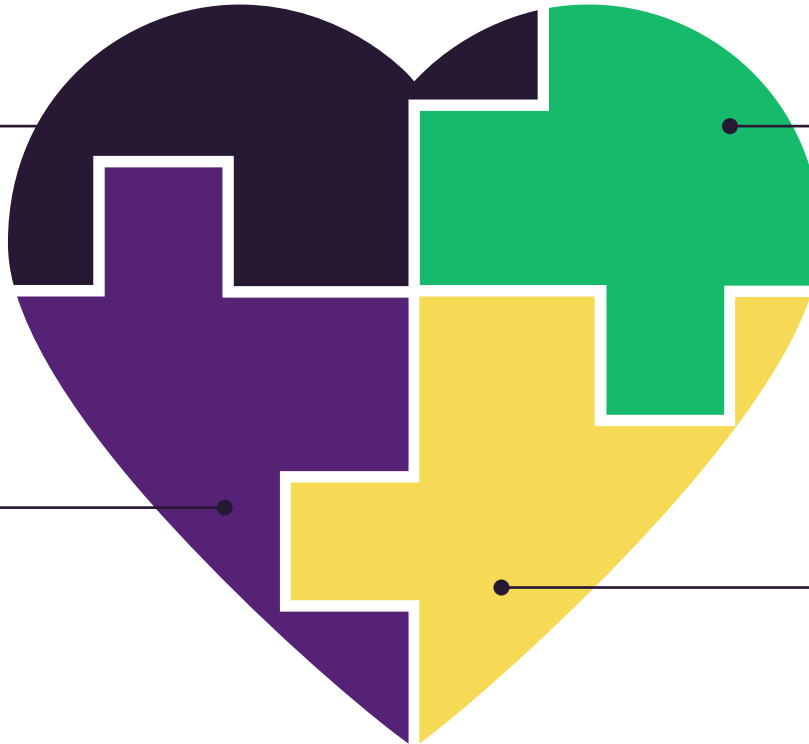

MSMEs are often at the forefront of innovation and are able **to adapt** to changing market conditions quickly

Job Creation

MSMEs employ around **75%** of the private sector workforce in Egypt

Social Development

MSMEs play important role in promoting **economic inclusion** and **social development**

Economic Growth

MSMEs make up over **90%** of all businesses in Egypt

Value Proposition

Establish a sustainable ecosystem to **enable & qualify GovTech start-ups** in order to **enhance public sector services'** design & delivery processes

Objectives

- Establish a sustainable ecosystem for qualifying **startups** and enabling their business in **GovTech**
- Enable qualified start-ups to build government service applications in order to enhance the citizen experience in a **Whole-of-Society** fashion
- Introduce innovative style of **co-creation** with **public sector servants, private sector** and the **citizens**

- Creating the GovTech ecosystem will have a profound and positive impact on the **Egyptian society**, fostering inclusive growth, empowering the private sector as well as improving citizens' lives.
- **Egypt global indicators** for the digital transformation expected to be positively influenced according to the enhancement of the e-participation

Digital Transformation is not a Technology Project .. It is a Mindset & Culture Change

THANK YOU

United Nations

Department of
Economic and
Social Affairs

1. What are two critical lessons learned in implementing data/digital transformation strategy in your country: what works and what doesn't?

It is the same every where ..

Government is Government every where

And People are people everywhere

Most important lessons are:

Capacity building and culture change are key factors

United Nations

Department of
Economic and
Social Affairs

2. What are two challenges that you face, and would like to learn from other countries?

Integration between different sectors (Government domains)

The struggle and challenge of designing and revamping the TO BE while working on the AS IS

United Nations

Department of
Economic and
Social Affairs

3. Suggest one recommendation for further discussion in UN forums; how can the UN and the global community better support countries in advancing effective data/digital governance strategies?

Lorem Ipsum is simply dummy text of the printing and typesetting industry. Lorem Ipsum has been the industry's standard dummy text ever since the 1500s
