Sustainable AI for Humanity

Governing AI for Humanity

Sustainability of AI

AI for Sustainability

1. What are two critical lessons learned in implementing data/digital transformation strategy in your country: what works and what doesn't?

1. Our advocacy covers Asia initially especially ASEAN and China
2. Plan to cover other regions including Middle East/Oman, Europe/WEF and US/SXSW
3. Lessons
    1. Missing funding and advocacy gap between Government/Public and Private
    2. Not enough funding for unified efforts to communicate and collaborate to mutually assist each other for readiness

2. What are two challenges that you face, and would like to learn from other countries?

1. Uneven and Uncertainty in AI strategy in ASEAN - Hence, ASEAN are seeking help from US and China and also should also help each other
2. Lack of awareness - of AI risks and AI for Humanity, including AI for the Global Majority and from the Global Majority. More public-private and philanthropy funding needed.

3. Suggest one recommendation for further discussion in UN forums; how can the UN and the global community better support countries in advancing effective data/digital governance strategies?

1. UN SDG #18 – AI for Humanity
2. Chief AI Officer at country level

UN SDG 18

AI FOR HUMANITY
