Setting the Scene Part I

Objective of the activity and workshop:

- Data and related issues and developments in the public sector have become increasingly important in terms of government analysis and operations, academic research, and real-world applicability and acceptance.
- Much of the operational activity in government is now data-driven, and many Governments would find it difficult, if not impossible, to function effectively without data.
- UNDESA Supported Project
- Seeks to address existing challenges and gaps in digital data management and cooperation, focusing on enhancing the institutional capacities of countries to utilize, manage and govern data in a comprehensive, objective and evidence-based manner, through regional and global cooperation.

Workshop Agenda

- 2 days workshop
- Key note address
- Presentation from speaker and expert on current situation, key finding, lesson sharing from other countries eg: Rok, Singapore, ITU
- Break out group- focus group discussion and output presentation
- Key finding outcome will be reported
- Closing and wrap up

ຂໍ້ມູນກອງປະຊຸມ

- Workshop link:
- bios of speakers
- presentations
- photos
