

# SINGAPORE'S DIGITALISATION JOURNEY

# Smart Nation and Digital Government Group (SNDGG)

Reporting under the Prime Minister's Office since 1 May 2017

PRIME MINISTER'S OFFICE  
SINGAPORE

MINISTERIAL COMMITTEE

SMART NATION  
&  
DIGITAL GOVERNMENT OFFICE

SMART NATION &  
DIGITAL GOVERNMENT GROUP

GOVTECH  
GOVERNMENT TECHNOLOGY  
AGENCY OF SINGAPORE

## SNDGG is overseen by an Inter-Ministerial Committee

SENIOR MINISTER  
**TEO CHEE HEAN**

Chairman

MINISTER  
**DR VIVIAN BALAKRISHNAN**

Member

Minister-in-charge of  
Foreign Affairs

MINISTER  
**JOSEPHINE TEO**

Member

Minister-in-charge of Smart Nation  
Initiative and Cyber Security Agency  
& Minister of Communications  
and Information

MINISTER  
**CHAN CHUN SING**

Member

Minister in-charge of  
Public Service

SENIOR MINISTER OF STATE  
**DR JANIL PUTHUCHEARY**

Member

Minister in-charge of  
GovTech

# Overview of the Government Technology Agency

**Over 3,400 strong**

*Engineering Digital  
Government, Making Lives  
Better*

## PRODUCTS & ENGINEERING

### Infrastructure

- WOG hosting infrastructure & networks

### Products & Capabilities

- Products and services for whole of Government
- Digital Services, Sensors & IoT, Data Science & AI, Cybersecurity, Infrastructure capabilities

### Strategic National Projects

- Implement Strategic National Projects

## SERVICES

### Agency IT

- CIO & technology officers in 60 % of government agencies

## GOVERNANCE

### Governance

- Sets ICT policies covering whole of Government

### Cyber Security

- Chief Information Security Officer for Government sector

# Achieving the Smart Nation vision through a Whole-of-Government approach

**DIGITAL ECONOMY  
FRAMEWORK**

**DIGITAL GOVERNMENT  
BLUEPRINT**

**DIGITAL READINESS  
BLUEPRINT**

# Digital Government Blueprint (2018 – 2023)

**A government that is digital to the core, and serves with heart**

## Who does a Digital Government serve?

- ▶ Citizens
- ▶ Businesses
- ▶ Public Officers

## What are the elements of a Digital Government?

- ▶ Services that are easy to use, reliable and relevant
- ▶ Seamless digital transactions
- ▶ Systems and data that are secure
- ▶ A digitally confident public service workforce
- ▶ A digitally enabled public service workplace

## How do we become a Digital Government?

- ▶ Strengthening integration between policy, operations and technology
- ▶ Re-engineering the Government's ICT infrastructure
- ▶ Operating reliable, resilient and secure systems
- ▶ Raising our digital capabilities to pursue innovation
- ▶ Integrating services around citizen and business needs
- ▶ Co-creating with citizens and businesses, and facilitating adoption of technology

<https://www.tech.gov.sg/digital-government-blueprint/>

## Digital Government Blueprint - Key Achievements

- **85%** of citizens and **76%** of businesses rated 5 & above on Gov digital services
- **94%** of government services can be **completed digitally end to end**
- **96%** of government services provides **E-payment options**
- **20,000** officers have been **trained in data analytics and data science**
- **All 20** ministries have submitted plans to use artificial intelligence
- **Over 60%** of relevant systems have been migrated to the Commercial Cloud

## Coordinating through **Ministry Family Digitalisation Plans**

- Appointed Chief Digital Strategy Officers of sufficient seniority tasked to develop MFDPs focused on transformative projects
- Intensive training on digitalisation methodology and user journey
- Focus on getting Ministry Families to:
  - Institutionalise MFDP with agency work planning cycles
  - Define their digital ambition specifically in digitalisation strategy, data & capability development
  - Over 100 transformational projects identified

## Building products with nation-wide strategic significance

### Strategic National Projects

Build digital infrastructure to enable transformation across Government and the nation

National Digital Identity

E-Payments

CODEX: Re-engineering Government

Leverage technology to create tangible improvements in citizens' experiences

Smart Nation Sensor Platform

Smart Urban Mobility

Smart & Sustainable Punggol

Reengineering Government processes to better serve citizens and businesses

LifeSG

GoBusiness

Build digital infrastructure to enable transformation across Government and the nation

- 1. National Digital Identity**
- 2. CODEX**

Reengineering Government processes to better serve citizens and businesses

- 3. Moments of Life**

Build digital infrastructure to enable transformation across Government and the nation

**1. National Digital Identity**

2. CODEX

Reengineering Government processes to better serve citizens and businesses

3. Moments of Life

## Singpass Delivers More Value

For paperless, presence-less & instant digital transactions

**>2,700 services**  
using Singpass

**500 million**  
transactions

**80% reduction** in  
transaction time  
for businesses

**800 organisations**  
using Singpass

**Face Verification** reduced  
waiting time at counters by  
**10 minutes**

**\$50 savings** per  
transaction using Myinfo

# Singpass app transacts with 4.8 million potential customers

### For individuals

- 4.1m users
  - 3.2m MAU
  - 85% transactions
  - 4.7 App rating
- ★★★★★

Build digital infrastructure to enable transformation across Government and the nation

1. National Digital Identity
2. **CODEX**

Reengineering Government processes to better serve citizens and businesses

3. Moments of Life

## **CODEX** - Re-engineering the Government through a modern Digital Backbone

Government  
Data Architecture

Government Technology Stack  
& Government on Commercial  
Cloud

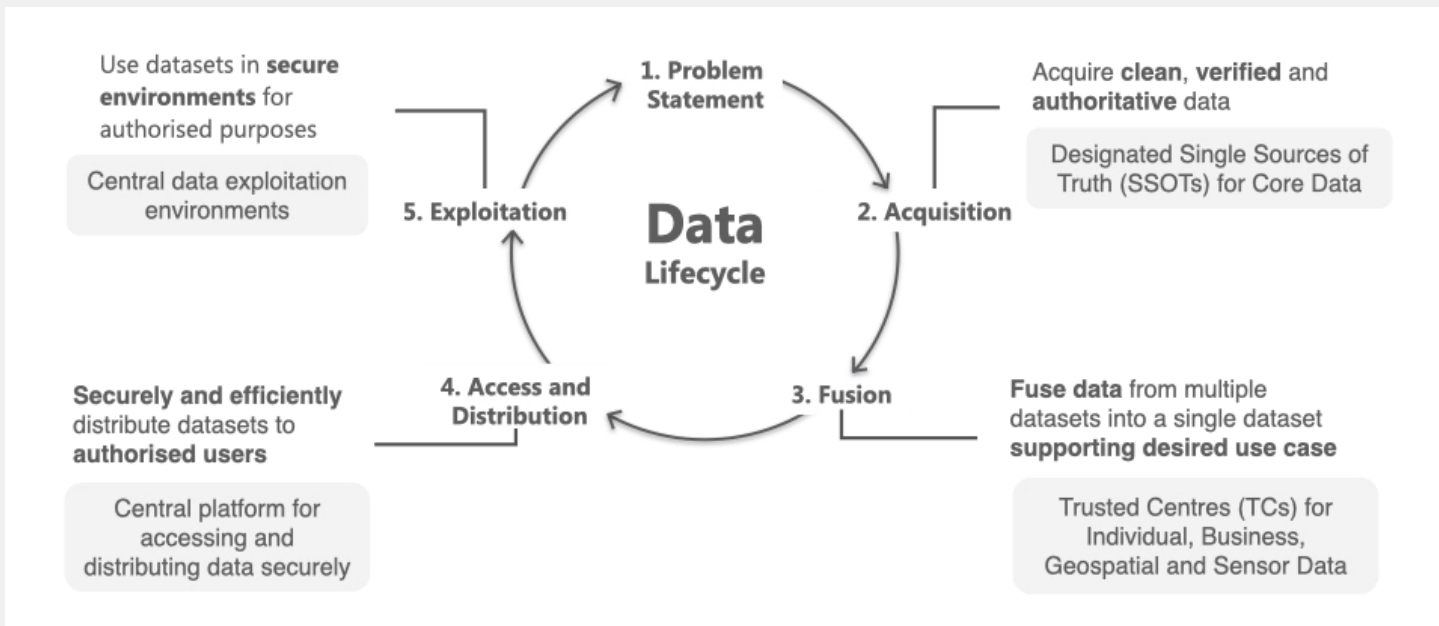

The **Government Data Architecture** is designed around the data lifecycle, and aims to reduce time taken for cross-agency data sharing from many months to 7 days

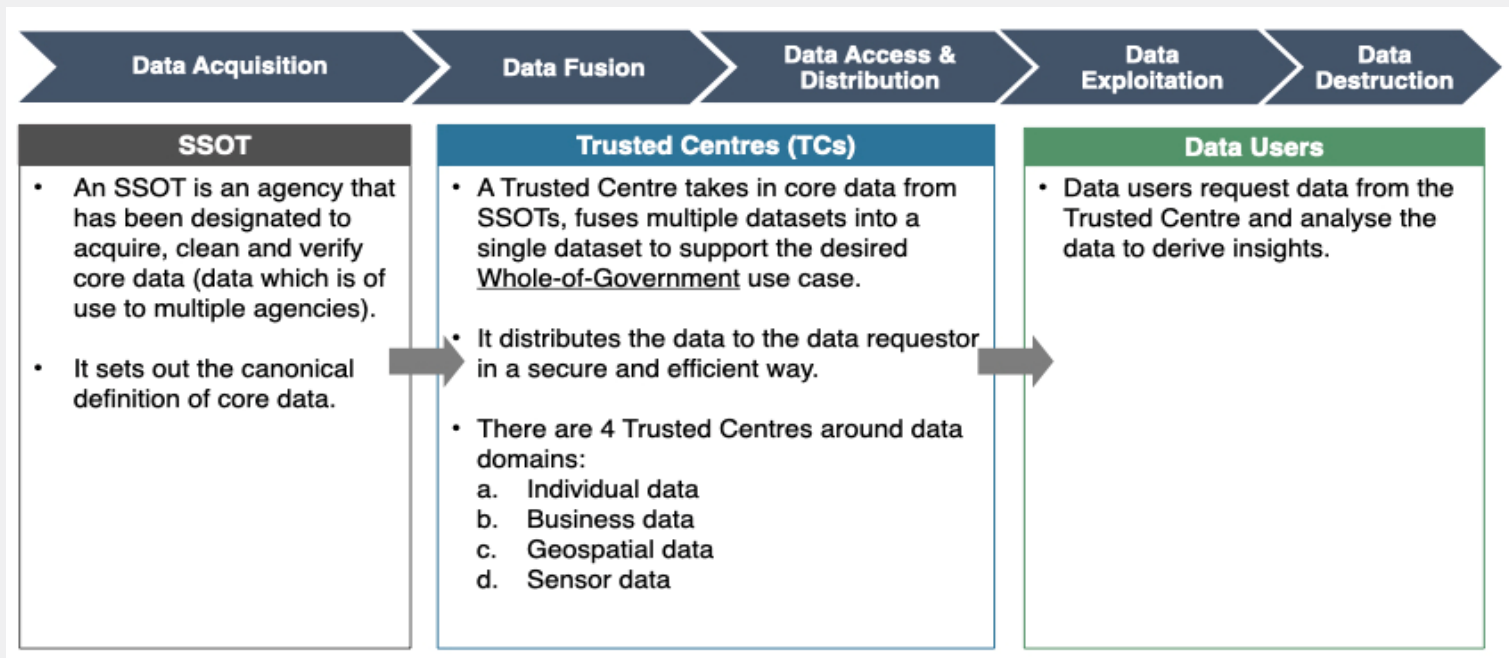

## Government Data Architecture has reduced data sharing time

# GDA and the role of Single Sources of Truth and Trusted Centres

➔ Flow of data

## GDA – Single Sources of Truth enabling MyInfo (“Tell us once”)

# GDA - a centralised data sharing platform for the Government through API Gateway (APEX)

**31**  
Agencies

**4,000+**  
APIs

**>100 Mil**  
Calls per month

## Benefits

Central Governance

Insights into API Usage

Central Discovery of APIs

Consent Driven Data Sharing

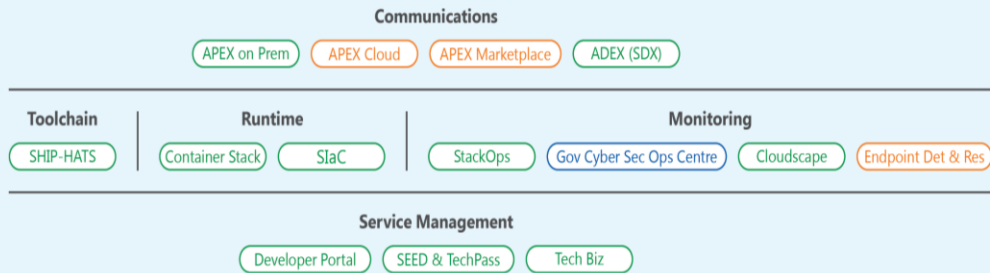

**Singapore Government Technology Stack (SGTS)** is a set of platform tools that streamlines and simplifies agencies development process

Live Work in Progress Planned

## Singapore Government Tech Stack (SGTS)

## SG Tech Stack (SGTS)

Service Layer (Reusable Components)

Base Layer (Standardised Dev Tools)

Network and Infra Services

Government on Commercial Cloud (GCC)

Build digital infrastructure to enable transformation across Government and the nation

1. National Digital Identity
2. CODEX

Reengineering Government processes to better serve citizens and businesses

### 3. Moments of Life

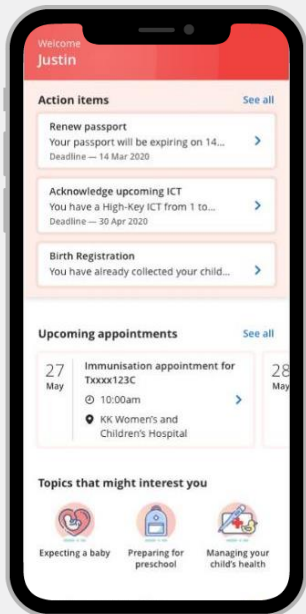

**Moments of Life (MOL)** – consolidating services according to citizens and businesses life junctures and significant milestones

# MOL – Enabling a simpler way for citizens to interact through LifeSG

## LifeSG

### Having a newborn

(e.g. registering for childbirth, download of eBirth certificate)

### Caregiving needs

(e.g. finding a day care centre, counselling for caregivers)

### Municipal matters

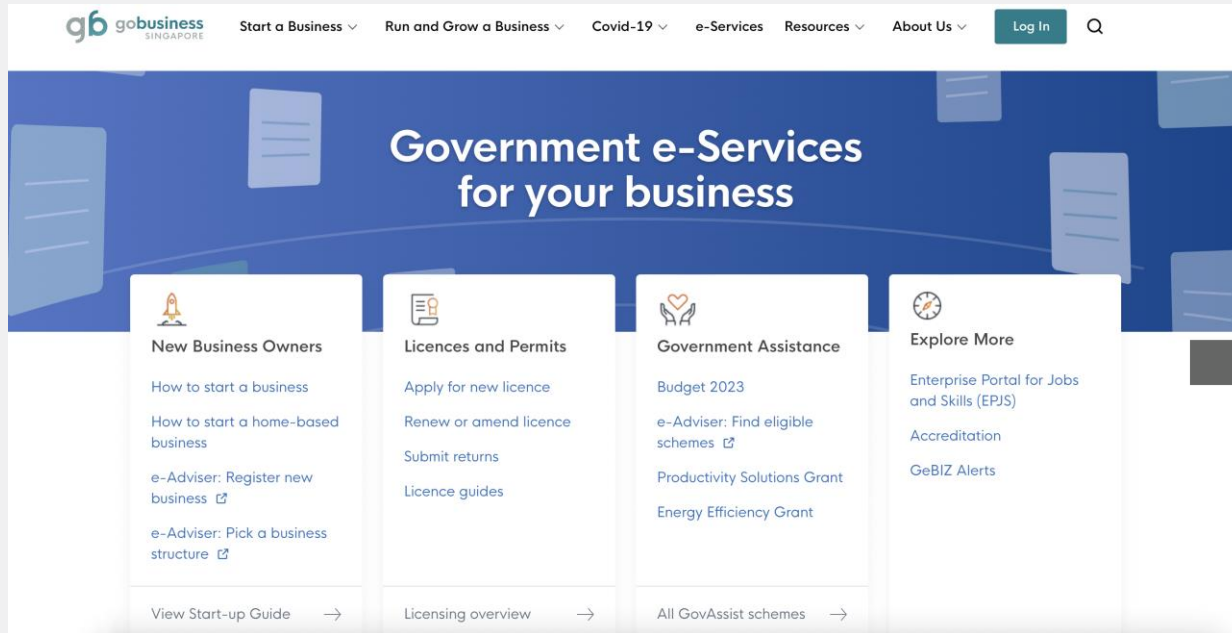

(e.g. lodge a complaint on neighbourhood facilities, booking a BBQ pit)

### Death of loved one(s)

(e.g. CPF nomination, booking of wake venue)

# MOL – a central platform offering streamlined services for business through **GoBusiness**

The screenshot shows the GoBusiness website homepage. At the top, there is a navigation bar with the GoBusiness logo and several menu items: 'Start a Business', 'Run and Grow a Business', 'Covid-19', 'e-Services', 'Resources', and 'About Us'. A 'Log In' button and a search icon are also present. The main heading reads 'Government e-Services for your business'. Below this, there are four main service categories: 'New Business Owners', 'Licences and Permits', 'Government Assistance', and 'Explore More'. Each category lists specific services and includes a 'View Start-up Guide' or similar link at the bottom of the category card.

Category	Services
New Business Owners	<ul style="list-style-type: none"><li>How to start a business</li><li>How to start a home-based business</li><li>e-Adviser: Register new business</li><li>e-Adviser: Pick a business structure</li></ul>
Licences and Permits	<ul style="list-style-type: none"><li>Apply for new licence</li><li>Renew or amend licence</li><li>Submit returns</li><li>Licence guides</li></ul>
Government Assistance	<ul style="list-style-type: none"><li>Budget 2023</li><li>e-Adviser: Find eligible schemes</li><li>Productivity Solutions Grant</li><li>Energy Efficiency Grant</li></ul>
Explore More	<ul style="list-style-type: none"><li>Enterprise Portal for Jobs and Skills (EPJS)</li><li>Accreditation</li><li>GeBIZ Alerts</li></ul>

# **Talent** and engaging the **Tech Community** a key enabler for Smart Nation

## Developing **talent** through different life stages

### Build pipeline

- PSC engineering
- Smart nation scholars
- Tech associate program

### Sustain interest and purpose

- Community development
- Stack

### Innovation culture

- White space funding
- Hackathon

### Start young

- Geek out
- Internships

### Build capabilities

- Capability centres

### Build careers

- Mentorship programme

### World class talent

- Smart nation fellows
- Community of distinguished engineers

# Engaging the **tech community** through the Singapore Government Developer Portal

Developer Portal as a one-stop resource hub for government digital products and services

## Singapore Government Developer Portal

[www.developer.gov.sg](http://www.developer.gov.sg)

Provides information on Government Developed resources

1. Product Information
2. Technical documentation
3. Guidelines and Best Practices
4. Community resources

Over **100** product information and technical documentation

[go.gov.sg/all-products](https://go.gov.sg/all-products)

**Karen Kee**

International and Community Development  
Lead at GovTech Singapore
