

How can external audits promote budget credibility?

LEVERAGING THE ROLE OF SUPREME AUDIT INSTITUTIONS

JOIN US FOR THIS VIRTUAL EVENT

As COVID-19 relief packages surpass trillions of dollars, independent oversight of government spending is more important than ever. External audits have an important role in ensuring a country's budget is credible. Credible national budgets provide a roadmap to effective service delivery and to the achievement of long-term national objectives such as the Sustainable Development Goals.

During this interactive session, we will discuss how external audits may contribute to understanding and enhancing budget credibility. We will reflect on the approach, tools and capacities needed by national audit offices to leverage their work effectively to promote budget credibility and will consider specific actions for moving forward.

THURSDAY MARCH 25, 2021
