

National SPP approach The Netherlands

Ivo Bonajo
Ministry of Interior Affairs
ivo.bonajo@minbzk.nl

First phase: activate the transition

Approach:

- *Start with projects and pilots*
- *Emphasis on network style*
- *Risk of starting with extensive policies can be a lot of theoretical discussion and inaction*

Second phase: support the transition

Approach:

- ***Set (obligatory) targets at organizational level***
- ***More emphasize on hierarchical style***
- ***Incorporate sustainability targets into “regular” policies (purchasing strategy, national climate agreement)***

Central government aims to achieve the following:

-  be climate-neutral by 2030 (climate topic)
-  a 50% reduction of the use of primary raw materials by 2030 and full circularity by 2050 (circularity topic)
-  stimulate labour inclusion, for instance by the creation of 5,000 participation jobs (social return topic)
-  make international production chains more sustainable by preventing or addressing abuses regarding working conditions, human rights and the environment (international social conditions topic)
-  stimulate innovation, for instance by acting as launching customer (innovation topic)

Closing remarks

Approach:

- *Key is finding the right balance between styles*
 - *Network > activation/innovation*
 - *Hierarchy > volume*
- *Establish an organization to facilitate the cultural and behavioral change necessary for sustainable procurement.*
- *Share experiences, national and internationally*

Netherlands Circular by 2050

A Circular Economy
in the Netherlands
by 2050

- **2050:** 100% circular economy
- **2030:** 50% reduction in use of virgin raw materials

1. **Procurement is key**
2. **We will not get there by ourselves**
3. **Circular economy doesn't stop at the borders**
